

Olympic Notebook

● **Mr. Willi Daume**, Vice-President of the IOC of which he has been a member for Germany since 1965, is in excellent physical condition. At the moment our last number was going to press, we had rather scant information. We have since learned that a knee injury sustained on a football pitch had obliged the 1st Vice-President of the IOC to undergo a minor operation. Thanks to his Strong constitution and fitness, Mr. Willi Daume has now completely recovered.

● **Hadj Mohammed Benjelloun**, IOC member for Morocco since 1961, has been re-elected Vice-President of the International Amateur Rugby Federation. Our hearty congratulations.

● **Dr. Abdel Mohamed Halim**, IOC member for Sudan since 1968, has been elected Vice-President of the African Football Confederation. We send him our sincere congratulations.

In the IOC Commissions

● **Professor Victor Rogozkin (URSS)** joins the IOC Medical Commission, where he replaces Dr. Nina Graevskaja whose new responsibilities prevent her from continuing to attend this commission's meetings.

Olympism in mourning

We were greatly moved to hear of the recent deaths of the following defenders of the Olympic and sports movement:

Karl Adam (Germany, 64 years of age), the "rowing wizard", founder in 1948 of the Ratzeburg Rowing Academy where he trained numerous Olympic champions.

Gérard de Ferrier (France, 69 years of age), Sports journalist on "Le Monde", "Le Progrès de Lyon" and many other papers, had been a member of the "Racing Club de France" for over fifty years.

The Olympic Review *sends its sincere condolences to the families and friends of these lamented sportsmen.*
